***Detailed Action***

- Response to the applicant's amendment dated 11/10/2009
- Claims 1-14 have been submitted for examination
- Claims 1-14 have been allowed

***Specification***

1. In view of the applicant's amended abstract filed on 11/10/2009, all objections to the specifications have been withdrawn.

***Response to Arguments***

2. Applicant's arguments see pages 3-6 filed on 11/10/2009 , with respect to independent claim 1 have been fully considered and are persuasive. The rejections of claim 1 under section35 USC 102 (b) have been withdrawn.

***Allowable Subject Matter***

3. Claims 1-14 are allowed.

***REASONS FOR ALLOWANCE***

The following is an examiner's statement of reasons for allowance:

4. The independent claim 1 of the present application teaches for example ; A path memory circuit for use in a Viterbi decoding process performed based on state transitions through a number n (n is a positive integer) of states, comprising M (M is a positive integer) stages of storage circuits, each storage

circuit including n rows of selective storage circuits, each selective storage circuit including a selection circuit for selectively outputting an input according to a result of the Viterbi decoding and a storage element circuit for storing a result selectively outputted from the selection circuit, the path memory circuit comprising:

a memory area A formed by the storage circuits of the first to i<sup>th</sup> (i is an integer from 0 to M) stages;

a memory area B formed by the Selective storage circuits that select and hold a decoding result for any state k (k is an integer from 1 to n) of the storage circuits from the i+1<sup>th</sup> stage to the M<sup>th</sup> stage; and

a memory area C formed by the selective storage circuits other than the memory area A and the memory area B,

wherein according to a memory length control signal, the storage circuits of the j<sup>th</sup> (j is an integer from i+ 1 to M)<sup>th</sup> and subsequent stages in the memory area C are stopped, and the selection circuits of the j<sup>th</sup> and subsequent stages in the memory area B select an output of the selective storage circuits of a preceding storage circuit belonging to the memory area B.

**The foregoing limitations are not found in the prior art of record.**  
**Particularly, none of the prior arts of record teach nor fairly suggest the emphasized limitation as cited in the independent claim 1 that comprises:**

A path memory circuit for use in a Viterbi decoding process performed based on state transitions through a number  $n$  ( $n$  is a positive integer) of states, comprising  $M$  ( $M$  is a positive integer) stages of storage circuits, each storage circuit including  $n$  rows of selective storage circuits, each selective storage circuit including a selection circuit for selectively outputting an input according to a result of the Viterbi decoding and a storage element circuit for storing a result selectively outputted from the selection circuit, the path memory circuit comprising:

a memory area A formed by the storage circuits of the first to  $i$  th ( $i$  is an integer from 0 to  $M$ ) stages;

a memory area B formed by the Selective storage circuits that select and hold a decoding result for any state  $k$  ( $k$  is an integer from 1 to  $n$ ) of the storage circuits from the  $i+1$ th stage to the  $M$  th stage; and

a memory area C formed by the selective storage circuits other than the memory area A and the memory area B,

wherein according to a memory length control signal, the storage circuits of the  $j$  ( $j$  is an integer from  $i+1$  to  $M$ )<sup>th</sup> and subsequent stages in the memory area C are stopped, and the selection circuits of the  $j$  th and subsequent stages in the memory area B select an output of the selective storage circuits of a preceding storage circuit belonging to the memory area B.

5. Claims 2-14 depend from claim 1.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
